

## REBAR TIE WIRE

- Rebar tie wire is used as binding wires
- Manufactured from soft annealed wire, which ensures the wire consistently forms the perfect tie every time
- Typical uses include bundling construction material together, securing rebar in the correct position to achieve the required strength of the complete concrete structure
- Galvanized rebar tie wire offers the benefits of greater corrosion resistance
- PVC coated tie wires offer a longer service life when compared to bright and hot dipped galvanized rebar tie wire
- Standard pack size: Each or 16 Coils/Box

Dimensions (Diameter x Package Size)	Approx. Length (feet)	Vanguard Code
<b>Bright Finish</b>		
16 G x 3-1/8 lb Coil	340	<b>4104 0016</b>
16.5 G x 3-1/8 lb Coil	400	<b>4104 00165</b>
<b>Hot Dipped Galvanized Finish</b>		
16 G x 3-1/8 lb Coil	340	<b>4104 00161</b>
<b>Green PVC Finish</b>		
16 G x 2-1/2 lb Coil	170	<b>4104 1016</b>
